

## PPXX Online 2021

### 1A - ENERGY (HYDROGEN)

IDs: 132,139,277,243

- Patrik Schneider - LyondellBasell

#### ID132: Derek Muckle

Radius Systems Limited (United Kingdom)

– AN EVIDENTIAL APPROACH TO USE OF POLYETHYLENE PIPE FOR HYDROGEN FUEL GASES

#### ID139: Stephan Kneck

Borealis Polymers (Finland)

– HYDROGEN TRANSPORT IN POLYMER PIPES FOR NATURAL GAS DISTRIBUTION

- TEN YEARS OF EXPERIENCE

#### ID277: Sjoerd Jansma

Kiwa Technology (The Netherlands)

– TESTING SPOOLABLE REINFORCED FLEXIBLE PIPES AND LINER MATERIAL  
FOR HIGH PRESSURE HYDROGEN TRANSPORT

#### ID243: Randall Knapp

Plastics Pipe Institute (United States of America)

– THE REGULATION OF PLASTIC GAS DISTRIBUTION SYSTEMS IN THE U.S.  
– UPDATES FROM THE PLASTIC PIPE RULE

A-sessions	B-Sessions
<b>2A - SERVICE LIFE</b> <b>IDs: 218,148,116,223,192</b> <b>- Peter Sejersen - The European Plastic Pipes and Fitting Association</b>	<b>2B - DRAINAGE</b> <b>IDs: 225,230,294,124,263</b> <b>- Dan Currence - Plastics Pipe Institute</b>
<b>ID218: David Chrystie-Lowe</b> ControlPoint Limited (United Kingdom) <b>– UK WATER INDUSTRY RESEARCH REVEALING THE LONG-TERM AGEING PERFORMANCE OF PLASTIC PIPES</b>	<b>ID225: Joe Babcanec</b> Advanced Drainage Systems (United States of America) <b>– DRAINAGE HANDBOOK STRUCTURAL DESIGN PROCEDURE</b>
<b>ID148: Wang Qian</b> Hongyue Plastic Group Co. (China) <b>– PREDICTIVE CORRELATION BETWEEN THE OXIDATION INDUCTION TIME OF PIPE AND THE SERVICE LIFE OF PIPE</b>	<b>ID230: Florian Arbeiter</b> Montanuniversitaet Leoben (Austria) <b>– PLASTIC PIPES FOR WATER DRAINAGE IN RAIL- AND MOTORWAY TUNNELS – MAJOR CHALLENGE</b>
<b>ID116: Herbert Terwyen</b> LyondellBasell (Germany) <b>– PRESSURE PIPELINE MADE OF HDPE – DETERMINATION OF REMAINING LIFE TIME AFTER 47 YEARS OF OPERATION IN LAKE OSSIACH (CARINTHIA, AUSTRIA)</b>	<b>ID294: Michael Plumier</b> University of Minnesota – Duluth (United States of America) <b>– LONG-TERM PERFORMANCE OF CORRUGATED HDPE PIPES MANUFACTURED WITH RECYCLED MATERIALS FOR RAIL AND HIGHWAY APPLICATIONS</b>
<b>ID223: Helmut Zanzinger</b> SKZ-Testing GmbH (Germany) <b>– CONFIRMATION OF LONG SERVICE LIVES OF PE-PIPES UNDER HIGHER TEMPERATURES APPLYING CONVENTIONAL OVEN TESTS AND MODERN HIGH-PRESSURE AUTOCLAVE TESTS</b>	<b>ID124: Amster Howard</b> Civil Engineering Consultant (United States of America) <b>– FLOWABLE FILL FOR PLASTIC PIPE</b>
<b>ID192: Shintaro Iwasaki</b> Osaka Gas Co. Ltd. (Japan) <b>– AN EVALUATION OF MECHANICAL PROPERTIES AND LONG-TERM DURABILITY OF AGED POLYETHYLENE PIPES FOR GAS DISTRIBUTION</b>	<b>ID263: Peter Sejersen</b> TEPPFA (Belgium) <b>– INSIGHTS ABOUT ENVIRONMENTAL PERFORMANCE OF CONCRETE PIPES</b>

3A - AROUND THE WORLD IDs: 273,261,278,285,162 - Camille Rubeiz - Plastics Pipe Institute	3B - INNOVATION IDs: 182,250,251,197,172 - Robin Bresser - Borealis
<b>ID273: Prashant Devidas Nikhade</b> Borouge India Ltd. (India) – EXTRA THICK AND LARGE DIAMETER PIPES MANUFACTURING WITH INNOVATIVE EXTRA LOW SAG PE MATERIAL IN INDIA	<b>ID182: April Zhou</b> Ningbo Fangli Technology Co. Ltd. (China) – AN EFFICIENT HOLLOW-WALL SPIRAL WINDING PIPE (A TYPE PIPE) PRODUCTION PROCESS
<b>ID261: Nobert Jansen</b> PE100+ Association (The Netherlands) – THE ADVANTAGES OF PE100 – GLOBAL CASE STUDIES	<b>ID250: Andrew White</b> FP Pigments (United Kingdom) – SMART TITANIUM DIOXIDE FOR ECONOMICAL AND ENVIRONMENTALLY SUSTAINABLE OPTIMISATION OF PLASTIC PIPE FORMULATIONS
<b>ID278: Grigorios Vigellis</b> Union Pipes Industry LLC (United Arab Emirates) – LARGE DIAMETER & THICK WALL HDPE PIPES PRODUCED & DEVELOPED IN THE MIDDLE EAST – 3 CASE STORIES	<b>ID251: Enrico Boccaleri</b> Università del Piemonte Orientale (Italy) – TESTING AND EVALUATION OF NANOADDITIVES IN U- PVC PIPES
<b>ID285: David Mancini, Brian Dorwart</b> David Mancini & Sons Inc & Brierly Associates (United States of America) – WORLD RECORD 54-INCH HDPE DIRECTIONAL DRILL SAVES A MIAMI BEACH PIPELINE PROJECT	<b>ID197: Andreas Frank</b> Polymer Competence Center Leoben (Austria) – SLOW CRACK GROWTH RESISTANCE OF REPROCESSED PVC
<b>ID162: Leanne Pichay</b> Columbia University Engineers Without Borders (United States of America) – APPLICATIONS OF HDPE PIPING TO SUPPLY WATER TO RURAL VILLAGES IN MOROCCO	<b>ID172: Ajay Taraiya</b> SABIC (The Netherlands) – A NEW GENERATION OF HIGH PERFORMANCE POLYETHYLENE PRESSURE PIPES

<b>4A - DESIGN</b> <b>IDs: 125,143,144,311</b> <b>- Norbert Jansen - Borealis AG</b>		<b>4B - SUSTAINABILITY</b> <b>IDs: 193,154,289,284</b> <b>- Bruce Hollands - Uni-Bell PVC Pipe Association</b>	
<b>ID125: Amster Howard</b> Civil Engineering Consultant, Lakewood (United States of America) – <b>BASIC AND ENGINEERED INSTALLATION OF HDPE PIPE</b>		<b>ID193: Ludo Debever</b> TEPPFA (Belgium) – <b>THE RECYCLING COMMITMENT OF THE EUROPEAN PLASTIC PIPE INDUSTRY</b>	
<b>ID143: Peter Sejersen</b> TEPPFA (Belgium) – <b>BEHAVIOR OF LARGE DIAMETER BURIED PIPES</b>		<b>ID154: Alessandro Marangoni</b> Althesys Strategic Consultants (Italy) – <b>A COST BENEFIT ANALYSIS OF PVC PIPES RECYCLING</b>	
<b>ID311: Peter Hubbard</b> University of California Berkeley (United States of America) – <b>DESIGN OF A DISTRIBUTED STRAIN MONITORING SYSTEM FOR HDPE WATER PIPELINES CROSSING EARTHQUAKE FAULT</b>		<b>ID289: Stefan Fokken</b> Baerlocher (Germany) – <b>SUSTAINABLE STABILISER SYSTEMS FOR PVC – 30 YEARS OF CA BASED SOLUTIONS</b>	

<b>5A - DESIGN CONSIDERATIONS</b> <b>IDs: 142,152,313,295</b> <b>- Ludo Debever - The European Plastic Pipes and Fitting Association</b>		<b>5B - ALTERNATIVE METHODS</b> <b>IDs: 270,179,184,296</b> <b>- Douglas Keller - LyondellBasell</b>	
<b>ID142: John M. Kurdziel</b> Advanced Drainage Systems Inc. (United States of America) <b>– UTILIZATION OF HDPE RECYCLED MATERIALS IN SANITARY SEWER APPLICATIONS</b>		<b>ID270: Thomas R. Kratochvilla</b> TGM – Federal Institute of Technology <b>– ACCELERATED PIPE TEST METHODS TO EVALUATE PE 100-RC MATERIALS</b> <b>– POSSIBILITIES FOR ISO STANDARDISATION</b>	
<b>ID152: Ilija Radeljic</b> Pipelife Norge AS (Norway) <b>– CHALLENGING THE 10% WALL THICKNESS RULE FOR HDPE MARINE PIPELINES</b>		<b>ID179: Susanne Nestelberger</b> Borealis Polyolefine GmbH (Austria) <b>– FINITE ELEMENT METHOD (FEM) USED TO SIMULATE THE STRESS/STRAIN OF THE POINT LOAD TEST (PLT) IN A BROADER STUDY TO SUPPORT THE FUTURE ISO TEST STANDARD</b>	
<b>ID313: Michael O'Rourke</b> Rensselaer Polytechnic Institute (United States of America) <b>– SEISMIC RESPONSE OF HDPE LATERALS</b>		<b>ID184: Dominique Gueugnaut</b> GRTgaz Research & Innovation Center for Energy (RICE) (France) <b>– RAPID AND INNOVATIVE IN-FACTORY PROCEDURE FOR TESTING THE PERFORMANCES OF PIPES CONTAINING VARIOUS PROPORTIONS OF RECYCLED MATERIALS</b>	
		<b>ID296: Jim Mason</b> Mason Materials Development (United States of America) <b>– EXPERIMENTAL DETERMINATION OF THE EFFECTS OF LIQUID HYDROCARBON ON THE LONG-TERM CREEP RUPTURE PROPERTIES OF PRESSURE PIPE GRADE UNPLASTICIZED POLYAMID-12</b>	

<b>6A - LEVERAGE LEARNINGS</b> <b>IDs: 127,129,181, 305</b> <b>- Jan Venter - Southern African Plastic Pipe Manufacturers Association</b>		<b>6B - ENERGY</b> <b>IDs: 203,211,298, 316</b> <b>- Hans Pierik - SABIC</b>	
<b>ID127: Sylvie Famelart</b> European Council of Vinyl Manufacturers (ECVM) (Belgium) <b>– PVC4PIPES TRAINING PACKAGE: 2020 UPDATE IS OUT!</b>		<b>ID203: Hua Ye</b> Sinopec Beijing Research Institute of Chemical Industry (China) <b>– TESTING AND APPLICATION OF POLYETHYLENE PIPING FOR NUCLEAR POWER IN CHINA</b>	
<b>ID129: Joe Venegas</b> Rollepaal (The Netherlands) <b>– ACCELERATING SUSTAINABILITY AND GROWING OUR BUSINESS WITH INNOVATIVE BUSINESS MODELS</b>		<b>ID211: Sultan Alkendi</b> Borouge PTE Ltd. (United Arab Emirates) <b>– GROWTH IN THE USE OF POLYETHYLENE PIPES IN MEA FOR UTILITY GAS DISTRIBUTION</b>	
<b>ID181: Wang Zhanjie</b> China Plastics Piping Association (CPPA) (China) <b>– THE DEVELOPMENT TREND OF CHINA’S PLASTIC PIPE INDUSTRY RESPONDING TO CHANGES IN THE ECONOMIC SITUATION</b>		<b>ID298: White Jee, Wes Long</b> TUBI Group, Sasol Chemicals North America LLC (United States of America) <b>– MOBILE EXTRUSION TECHNOLOGY – A CASE STUDY USING AN INNOVATIVE MEANS OF ASSURING HDPE PIPE SUPPLY IN THE PERMIAN BASIN OF WEST TEXAS</b>	
<b>ID305: Peter Dyke</b> Alliance for PE pipe (United States of America) <b>– A COMMERCIAL TRADE ASSOCIATION EXPLORED</b>		<b>ID316: Chris Ampfer</b> WL Plastics (United States of America) <b>– ALLOWABLE SCRATCH DEPTH RECOMMENDATIONS FOR POLYETHYLENE PRESSURE PIPE</b>	

<b>7A - VIRTUAL TOOLS</b> <b>IDs: 151,237,307,258</b> <b>- Wang Zhanjie - China Plastics Piping Association</b>		<b>7B - EFFICIENT GROWTH</b> <b>IDs: 269, 141, 146, 226</b> <b>- Christain Apel - POLYPLASTIC Group</b>	
<b>ID151: Kurel van Laarhoven</b> KWR Water Research Institute (The Netherlands) – <b>UNLOCKING MODEL PREDICTIONS OF SLOW CRACK GROWTH IN PVCU PIPES FOR THE DUTCH WATER UTILITIES</b>		<b>ID269: Patrick Vibien</b> Plastics Pipe Institute (United States of America) – <b>DEVELOPMENTS IN NORTH AMERICAN CONDUIT PRACTICES</b>	
<b>ID237: Dustin Langston</b> WL Plastics (United States of America) – <b>ONLINE ENGINEERING TOOLS FOR DESIGN AND FIELD ENGINEERS</b>		<b>ID141: Jennifer Ravereau</b> SUEZ (France) – <b>LONG-TERM DURABILITY OF NEW POLYMER COMPOSITE VALVES FOR DRINKING WATER NETWORKS</b>	
<b>ID307: Peter Dahlerup</b> Hultec / Simulation Driven Engineering (Costa Rica) – <b>The Rieber System Revisited: Building on Parmann’s Legacy</b>		<b>ID146: Ignacio. Muñoz de Juan</b> Molecor Tecnología (Spain) – <b>PVC-O DN800: EFFICIENT TRANSFORMATION FROM SOIL TO IRRIGATED LAND</b>	
<b>ID258: Andreas Moerman</b> KWR / The PeopleGroup (The Netherlands) – <b>GEOWATER: SOFTWARE FOR INTEGRAL DESIGN OF TERTIARY NETWORKS</b>		<b>ID226: Mike Griffin</b> Victaulic (United States of America) – <b>RESTRAINED MECHANICAL DEVICES PERFORMANCE CHARACTERISTICS, A TEST PROTOCOL</b>	

<p><b>8A - WATER APPLICATIONS</b>  <b>IDs: 131,155,117,198,256</b>  <b>- Vincent Stone - EU Council of Vinyl Manufacturers</b></p>	<p><b>8B - MOVING BEYOND</b>  <b>IDs: 157,209, 304,221,216</b>  <b>- Zoran Davidoski - Pipelife</b></p>
<p><b>ID131: Ruediger Liske</b>          BASF (Switzerland)  <b>– RISK ASSESSMENT OF NON-INTENTIONALLY ADDED SUBSTANCES (NIAS) IN POTABLE WATER.THE EXAMPLE OF A PHOSPHITE, A PROCESS STABILIZER COMMONLY USED IN THE DESIGN OF DRINKING WATER PIPES POLYOLEFIN BASE</b></p>	<p><b>ID157: Simona Africano</b>          LyondellBasell (Italy)  <b>– ADVANCING PP-RCT: PIPE APPLICATIONS EXAMPLES AND NEXT CHALLENGES</b></p>
<p><b>ID155: Christoph Losher</b>          FABES Forschungs-GmbH (Germany)  <b>– MODELLING THE MIGRATION FROM PVC-U PIPES INTO DRINKING WATER</b></p>	<p><b>ID209: Alex Stolarz</b>          Dow Europe GmbH (Switzerland)  <b>– LOW TEMPERATURE DISTRICT HEATING</b></p>
<p><b>ID117: Steve Sandstrum</b>          Borealis (United States of America)  <b>– POLYPROPYLENE PIPE IN DEMANDING HYDRONIC HEATING APPLICATIONS</b></p>	
<p><b>ID198: Lei Wang</b>          Rifeng Enterprise Group (China)  <b>– APPLICATION OF PP-R COMPOSITE REINFORCED PIPE IN HOT AND COLD WATER SYSTEM</b></p>	<p><b>ID221: Kensei Inoue</b>          High Stiffness Polyethylene Pipes Association (Japan)  <b>– NEW CHALLENGING APPLICATION AS USED PEAT LAND</b></p>
<p><b>ID256: Greg Scoby</b>          Crossbore Consultants (United States of America)  <b>– HISTORY OF HDPE USE AT THE CITY OF PALO ALTO FOR POTABLE WATER DISTRIBUTION</b></p>	<p><b>ID216: Holger Brüning</b>          Basell Polyolefine GmbH (Germany)  <b>– ADVANCING ELECTRICITY NETWORKS BY THE USE OF PE100-HT AS CONDUCTS FOR HIGH VOLTAGE UNDERGROUND CABLES</b></p>

<b>9A - PROCESSING</b> <b>IDs: 108,145,170,140</b> <b>- Yamada Sayaka - Kobel Steel Company</b>	<b>9B - STUDY OF EFFECTS</b> <b>IDs: 222,205,299,241</b> <b>- Adriana Velasquez - Shell</b>
<b>ID108: Antonio Rodolfo Jr.</b> Braskem S/A / USp (Brazil) <b>– FRACTURE MECHANICS TECHNIQUES IN LARGE DIAMETER PVC PIPE</b>	<b>ID222: Paul J. Freudenthaler</b> Johannes Kepler University Linz (Austria) <b>– EFFECT OF CHLORINATED WATER ON THE FATIGUE CRACK GROWTH RESISTANCE OF POLYETHYLENE COMPOUNDS WITH RECYCLATE CONTENT FOR PIPE APPLICATIONS</b>
<b>ID145: Christian Schalich</b> SIKORA AG (Germany) <b>– INNOVATIVE MILLIMETER WAVE TECHNOLOGY FOR MEASURING THE PIPE WALL THICKNESS AT THE BEGINNING OF THE EXTRUSION PROCESS</b>	<b>ID205: Alireza Sahaf Amin</b> Vahid Industrial Group (Iran) <b>– RIGHT STABILIZATION AND QUICK MEASUREMENT OF GEL CONTENT IN PE-Xa PIPE</b>
